

Trig Ratios Practice

Get out your piece of paper and copy these down!

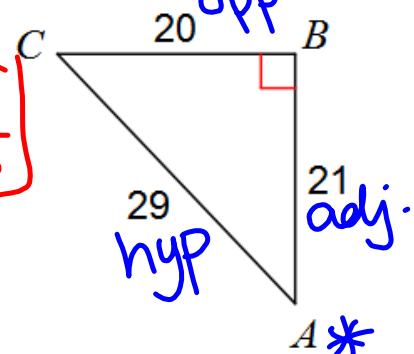

Find the value of each trigonometric ratio.

$$\cos Z = \frac{21}{35} = \frac{3}{5}$$

$$\tan A = \frac{20}{21}$$

$$\sin C = \frac{24}{40} = \frac{3}{5}$$

Find the missing side. Round to the nearest tenth.

$$15 \cdot \tan 72 = \frac{x}{15} \cdot 15$$

$$15 \tan 72 = x$$

$$\boxed{46.2 \approx x}$$

$$x \cdot \sin 38 = \frac{13}{x} \cdot x$$

$$\frac{x \cdot \sin 38}{\sin 38} = \frac{13}{\sin 38}$$

$$x = \frac{13}{\sin 38}$$

$$\boxed{x \approx 21.1}$$

$$x \cdot \cos 34 = \frac{13}{x} \cdot x$$

$$\frac{x \cdot \cos 34}{\cos 34} = \frac{13}{\cos 34}$$

$$x = \frac{13}{\cos 34}$$

$$\boxed{x \approx 16.5}$$

Find the measure of the indicated angle to the nearest degree.

$$\tan x = \frac{30}{48}$$

$$\tan^{-1}(\tan x) = \tan^{-1}\left(\frac{30}{48}\right)$$

$$x = \tan^{-1}\left(\frac{30}{48}\right)$$

$$x \approx 32^\circ$$

$$\cos x = \frac{7}{17}$$

$$\cos^{-1}(\cos x) = \cos^{-1}\left(\frac{7}{17}\right)$$

$$x = \cos^{-1}\left(\frac{7}{17}\right)$$

$$x \approx 66^\circ$$

$$\sin x = \frac{35}{47}$$

$$\sin^{-1}(\sin x) = \sin^{-1}\left(\frac{35}{47}\right)$$

$$x = \sin^{-1}\left(\frac{35}{47}\right)$$

$$x \approx 48^\circ$$
